Cooperator Agreement No. _____

**MASTER
STEWARDSHIP AGREEMENT
Between The
TRINITY COUNTY RESOURCE CONSERVATION DISTRICT
And the
USDA FOREST SERVICE, PACIFIC SOUTHWEST REGION**

This Master Stewardship Agreement is hereby made and entered into by and between the Trinity County Resource Conservation District, hereinafter referred to as "TCRCD," and the USDA Forest Service, Pacific Southwest Region, hereinafter referred to as the "Forest Service," under the authority and provisions of the Agricultural Act of 2014, Pub. L. 113-79, sec. 8205.

Background: In 2003 Congress authorized the Forest Service and the Bureau of Land Management (BLM) to enter into stewardship contracts and agreements "to achieve land management goals for the national forests that meet local and rural community needs." The primary focus of this legislation is to achieve land management goals through stewardship projects awarded under contracts or agreements. Unique to the legislation is the ability to exchange goods for services that meet the land management objectives.

This is the second 10 year Master Stewardship Agreement (MSA) between the TCRCD and the Forest Service. The area addressed in this Master Stewardship Agreement is known as the Weaverville Community Forest and lies within the borders of the State of California. The Weaverville Community Forest (WCF) is a partnership between the Bureau of Land Management (BLM), the Forest Service and the TCRCD to manage 14,963 acres of federal land as a community forest. The Forest Service has up to 11,848 acres to be treated during the term of this Master Stewardship Agreement (See Appendix B for Map of WCF). The WCF is an important landscape for protection and enhancement of natural resources in the vicinity and adjacent to Weaverville, and for providing an avenue of employment to the local workforce.

The Weaverville Community Forest is located within the wildland-urban interface (WUI) surrounding the town of Weaverville in Trinity County, California. The WCF includes productive, yet overly dense timberlands, historic and prehistoric resources, recreational uses, high visual quality, and critical wildlife habitat and anadromous fisheries. The maintenance of high water quality and quantity is very important to this area due to the municipal water supply, critical fisheries habitat and Central Valley water supply uses of the Trinity River and its tributaries. This multi-year stewardship agreement can facilitate stewardship projects within this stewardship area (designated under the Browns Project) designed to promote forest health and resilience, watershed restoration and protection of resources listed above and to protect adjacent landowners from damage due to uncontrolled wildfire.

The WCF partners work cooperatively, with the participation of the Weaverville Community Forest Steering Committee, to achieve these goals through development and implementation of an Annual Operating Plan that describes projects and provides a financial and operating plan.

I. PURPOSE:

The purpose of this Master Stewardship Agreement is to document the cooperative effort between the parties for landscape restoration activities within the Weaverville Community Forest, located on the Trinity River Management Unit in accordance with the following provisions and the hereby incorporated Template for Stewardship Supplemental Project Agreement (SPA), attached as Exhibit A.

II. STATEMENT OF MUTUAL BENEFIT AND INTERESTS:

The Forest Service is a land management agency dedicated to the wise use and management of National Forest System (NFS) lands, including the responsibility for maintaining and improving resource conditions.

The mission of the U.S. Forest Service is this "To sustain the health, diversity, and productivity of the Nation's forests and grasslands to meet the needs of present and future generations." As an integral part of this mission, the Pacific Southwest Region's Leadership Intent and annual prioritization is to retain and restore ecological sustainability and resilience of national forest lands to achieve sustainable ecosystems that provide a broad range of services to humans and other organisms. Ecologically healthy and resilient landscapes, rich in biodiversity, will have greater capacity to adapt and thrive in the face of natural disturbances and large scale threats to sustainability, especially under changing and uncertain future environmental conditions such as those driven by climate change and increasing human use.

TCRCD is a local, county-wide special district established under state law, and receives funding from local, state, federal agencies and non-governmental organizations. The Board of Directors is guided by landowners and the community in their decisions and actions. The TCRCD focuses attention on land, water and related resource problems on public and private lands, develops programs to solve them, and enlists and coordinates help from public and private sources that can contribute to accomplishing the district's goals. In addition, the TCRCD works to further conservation education in the community, coordinating educational programs and serving as a community clearinghouse for information and services.

All projects conceived under this Master Stewardship Agreement will undergo a collaborative process to determine specific ecological/watershed improvements. The collaborative process will ensure that the benefits of undertaking restoration activities are mutually beneficial to TCRCD and the Forest Service as well as being beneficial to a wide diversity of interests involved in collaboration.

Both parties share an interest in improving the ecosystem condition and function of the

landscape. A healthy landscape provides a variety of benefits beyond the needs of a single species, and therefore benefits both parties.

It is therefore mutually beneficial for the parties to work together to implement landscape restoration and enhancement projects.

This Master Stewardship Agreement will provide an opportunity for the parties to seek funding to expand partnership opportunities, and to garner new and additional support from partners, including but not limited to the timber industry, Federal and non-Federal entities, tribal entities, and TCRCD's members and volunteers. Mission accomplishment for both parties will be furthered by the restoration of natural resources across the landscape.

All projects conceived under this Master Stewardship Agreement will undergo a collaborative process to determine specific habitat improvements. The collaborative process will ensure that the benefits of undertaking restoration activities are mutually beneficial to TCRCD and the Forest Service as well as being beneficial to a wide diversity of interests involved in collaboration.

Both parties share an interest in improving the ecosystem condition and function of the landscape. A healthy landscape provides a variety of benefits beyond the needs of a single species, and therefore benefits both parties.

It is therefore mutually beneficial for the parties to work together to implement landscape restoration and enhancement projects.
